## System B62

The perfect matrix on which the beMatrix B62® system is based means that the dimensions and combinations always fit exactly, both on the design drawings and in reality. The designer can work in total freedom.

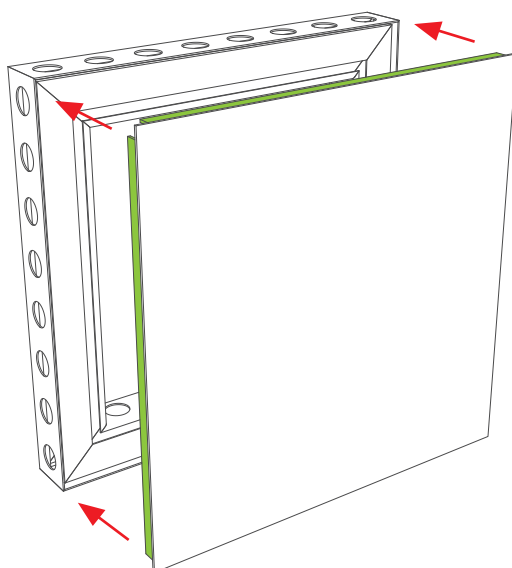

Sharp and rounded corners, angled and sloping walls, indentations or T-joints, arches and curves - everything is possible. And because we also combine lighting, furniture and displays with the B62® profiles, this system gives you the complete look and feel you want.

**“A clean, uniform, seamless stand. That’s what my customers want from me”**

Seamless

Not Seamless

By avoiding visible joins and seams, you can achieve a far better-looking result than was previously possible with the beMatrix system. Customers and show visitors are unanimously enthusiastic about the sleek appearance this new technique creates.

Textile are attached using a silicone strip

## System B62 is:

- Quick and accurate design, quotation and engineering support.
- Exhibits are built and inspected prior to delivery.
- In-house welding and wood working capability for increased customization.
- In-house graphic printing for one stop shop solutions.
- Cost Saving.
